

Mohd Galiv

Aspiring AI/ML Engineer & Python Developer
mohdgalivgazi@gmail.com | github.com/mohdgaliv | mohdgaliv.github.io/CodewithGaliv

OBJECTIVE

Passionate 10th-grade student and self-taught developer with hands-on experience building and deploying real-world web applications. Dedicated to mastering Python and breaking into the field of Artificial Intelligence and Machine Learning. Eager to contribute to innovative AI/ML projects while continuously expanding technical skills.

TECHNICAL SKILLS

Languages	Python (Learning & Practicing), HTML, CSS
Frameworks & Libraries	Flask, Unicorn, Pillow, PyPDF2, TailwindCSS
Tools & Platforms	GitHub, Git, Render (Cloud Deployment), Google Search Console
AI/ML Interest	Machine Learning concepts, Artificial Intelligence (actively learning)
Other	Web Deployment, SEO Basics, REST APIs, Portfolio Development

PROJECTS

FileTools Pro — Image & PDF Converter Web App

Flask | Python | Pillow | PyPDF2 | TailwindCSS | Render | Unicorn

Live: filetools-pro.onrender.com | GitHub: github.com/mohdgaliv/filetools

- Designed and built a fully functional web application for converting images and PDFs online.
- Deployed on Render cloud platform using Unicorn as production WSGI server.
- Implemented responsive UI with TailwindCSS for seamless experience across all devices.
- Configured Google Search Console for SEO indexing and site ownership verification.
- Managed project dependencies via requirements.txt and version-controlled with Git/GitHub.

Personal Portfolio Website — CodewithGaliv

HTML | CSS | JavaScript | GitHub Pages

Live: mohdgaliv.github.io/CodewithGaliv | GitHub: github.com/mohdgaliv

- Created and deployed a personal portfolio website showcasing projects and skills.
- Hosted on GitHub Pages with custom domain integration and social media promotion.
- Demonstrates front-end development skills and understanding of web deployment pipelines.

EDUCATION

Secondary Education (10th Grade)

Currently Enrolled — 2025

Self-learning Python, web development, and AI/ML concepts through online resources, documentation, and hands-on project building alongside formal education.

SELF-LEARNING & DEVELOPMENT

- Actively learning Python with focus on data structures, OOP, and AI/ML libraries.
- Studying Flask web framework and REST API development through project-based practice.
- Exploring Machine Learning fundamentals — algorithms, datasets, and model training concepts.
- Consistently contributing to GitHub and maintaining public open-source project repositories.
- Following AI/ML industry trends and studying real-world applications of deep learning.
